Initial Comments

The allowability for claims directed towards the following species is noted :

N,N-dimethylaminoethyl-N'-methylaminoethanol

N-acetyleneethylenediamine

N,N,N'-trimethyldiethylenetriamine

N,N,N',N''-tetramethyltriethylenetetramine

N N N' N'' N'''-pentamethyltetraethylenepentamine

N,N,N' N'' N''' N''''- hexamethylpentaethylenehexamine

Rejection over LaCarte et al.(6,534,556) is withdrawn in light of applicants' amendment cancelling this species.

The following rejection is set forth herein:

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 23 and 29-33 are rejected under 35 U.S.C. 103(a) as being unpatentable over Scherzer et al.(6,031,013) in view of Heinemann et al.(6,306,920).

Scherzer et al. discloses preparations of rigid polyurethane foams prepared using trimethylethylenediamine catalysts, customary fluorocarbon blowing agents, water, and other auxiliary agents in amounts meeting the amount values of applicants' claims (see claim 9, as well as, the entire document).

Scherzer et al. differs from applicants' claims in that HFC 245fa is not particularly required. However, Heinemann et al.(6,306,920) exemplifies teaching of HFC 245fa in rigid foam preparation for the purpose of achieving the foaming effect. Accordingly, it would have been obvious for one having ordinary skill in the art to have employed the HFC 245fa blowing agent disclosed by Heinemann et al. for the purpose of imparting its foaming effect in the preparations of Scherzer et al. in order to arrive at the processes of

applicants' claims with the expectation of success in the absence of a showing of new or unexpected results.
